Water Bottle Prompt 1:

Write a product description for a water bottle.

Water Bottle Response 1:

HydraPeak Insulated Water Bottle

Stay refreshed from the first sip to the last. The HydraPeak keeps drinks ice-cold for up to 24 hours or piping hot for 12, thanks to double-wall vacuum insulation and a durable 18/8 stainless steel body.

The leak-proof, one-handed flip lid makes sipping easy on the go, while the wide mouth fits ice cubes and cleans up in seconds. A powder-coated finish gives you a sweat-free, slip-resistant grip, and the bottle slides into most cup holders and backpack side pockets.

BPA-free, dishwasher-safe, and built to survive daily drops and dents, it's the one bottle that goes from the gym to the trail to your desk.

Key features:

- 24-hour cold / 12-hour hot insulation
- Leak-proof flip lid with carry loop
- Wide mouth for ice and easy cleaning
- Sweat-free, non-slip powder-coated finish
- BPA-free, dishwasher-safe
- Available in 20 oz, 32 oz, and 40 oz

Water Bottle Prompt 2:

You're a brand manager for a water bottle manufacturer.

Write a product description for a water bottle.

Water Bottle Response 2:

Hydra One Insulated Water Bottle, 24 oz

Cold for 24 hours. Hot for 12. Ready for whatever your day throws at it.

Meet the bottle that goes everywhere you do. The Hydra One is built with double-wall vacuum insulation, so your ice stays frozen through the morning commute, the gym, and the afternoon slump. Fill it with coffee at sunrise and it's still warm at lunch.

Why you'll love it

- **Keeps temperature:** 24 hours cold, 12 hours hot
- **Built tough:** 18/8 stainless steel with a powder-coated finish that grips well and resists scratches
- **Leakproof lid:** Twist-lock cap with a carry handle, so it's safe to toss in your bag
- **Fits your life:** Slim base slides into cup holders and bike cages
- **Easy to clean:** Wide mouth fits ice cubes and a bottle brush; dishwasher safe
- **Clean taste:** BPA-free, with no metallic aftertaste

Specs
Capacity: 24 oz (710 ml) | Height: 10.5 in | Weight: 13 oz | Colors: Glacier Blue, Midnight Black, Sage, Coral

Drink more water, skip the single-use plastic, and carry something you'll actually want to hold.

Hydra One. Stay refreshed.

Water Bottle Prompt 3:

You're a brand manager for a water bottle manufacturer. Write a product description for a water bottle. The target audience is cyclists participating in endurance races.

Water Bottle Response 3:

The Apex 750: Hydration Built for the Long Haul

Mile 90 doesn't care how you felt at mile 10. What it cares about is whether you stayed ahead of your fluids, your fuel, and your focus. The Apex 750 was engineered for that moment, so you never have to think about your bottle when everything else is screaming for your attention.

One-handed, eyes-up operation. The self-sealing bite valve opens with a light squeeze and shuts the instant you let go. No twisting, no fumbling, no taking a hand off the bars at 30 mph in a tight pack.

Cold that lasts. Our double-wall insulated body keeps fluids cold for up to 4 hours in summer heat, so your last sip at the final climb is as refreshing as your first. A wide-mouth opening fits ice cubes and powder mixes for easy loading at feed zones.

Fits your bike, your cage, your race. At 750 ml, it holds enough for a hard 90 minutes without adding bulk. The contoured, tapered profile slides into standard cages and stays put over cobbles, gravel, and rough descents, with a textured grip zone that holds firm even when your gloves are soaked.

Fast to refill, easy to clean. The wide neck allows quick pours from neutral-support bottles and gives you room to scrub out electrolyte residue. Every component is BPA-free, dishwasher-safe, and taste-neutral, so your gels and mixes taste like they should.

Built to be seen and found. A high-visibility band and reflective logo help you spot your bottle in a messy feed zone handoff or a crowded support vehicle.

Specs at a glance

- Capacity: 750 ml (25 oz)
- Weight: 130 g (4.6 oz), empty
- Material: BPA-free, food-grade double-wall construction
- Cage compatibility: Standard cages
- Care: Top-rack dishwasher safe

Race-day ready. Every mile.
The Apex 750. Because the finish line rewards those who stay in the game.

Monthly Coffee Subscription Prompt 1:

Write a product description for a monthly coffee subscription.

Monthly Coffee Subscription Response 1:

Small-Batch Coffee, Delivered Monthly

Great coffee shouldn’t depend on a lucky trip to the right café. Every month, we deliver a fresh-roasted bag from a different small farm or co-op, picked by our roasters and shipped within days of roasting, so what lands on your doorstep tastes the way it was meant to.

What you get

- A 12 oz bag of freshly roasted, single-origin beans each month
- A tasting card with the story behind the farm, the flavor notes to look for, and a suggested brew method
- Your choice of whole bean or ground to suit your setup, from French press to espresso

Why you’ll love it

- **Always fresh.** Roasted to order and shipped right away, never left sitting on a shelf.
- **Always new.** Explore a different region, roast, or processing style every month, from bright and fruity Ethiopians to chocolatey, nutty Colombians.
- **Always fair.** We buy directly from growers and pay above fair-trade prices, so the people behind your cup are rewarded for their work.
- **Always flexible.** Skip a month, change your roast preference, or cancel anytime with no fees or hassle.

Pick your plan

- **Light and Bright:** fruity, floral, and vibrant
- **Medium and Balanced:** smooth, caramel-sweet, and easy to love
- **Dark and Bold:** rich, smoky, and full-bodied
- **Surprise Me:** a rotating mix for the adventurous

Treat yourself to a better morning, or give the gift of one. Start your subscription today, and your first bag ships this week.

Monthly Coffee Subscription Prompt 2:

You're an expert coffee roaster, and expert gamer.

Write a product description for a monthly coffee subscription.

Your audience is fellow gamers not as seasoned in coffee.

Rules:

- 200 Word cap.
- Sound very excited, almost as if you've had too much coffee.
- Don't use more than 8 bullet points.

Monthly Coffee Subscription Response 2:

☕ ⚡ LEVEL UP YOUR MORNING: THE LOOT CRATE FOR YOUR BREW! ⚡ ☕

PLAYER ONE, WAKE UP!!! Every month, a fresh-roasted bag of coffee spawns at your door, and I am SO HYPED to tell you about it!!!

I'm a roaster, which means I've spent years obsessing over beans, and I'm also a gamer, so I built this crate for YOU. No coffee knowledge required. Zero. It's a tutorial level with no skill tree to grind!

Your monthly drop includes:

- 🎮 **A new bean each month:** different origins, like unlocking new maps!
- 🔥 **Roasted days before shipping:** peak freshness, no stale loot!
- 📖 **Easy tasting cards:** "blueberry," "chocolate," "caramel," no snobby jargon!
- ⏱️ **Foolproof brew guides:** works with any gear, even that sad drip machine!
- 🏆 **Flavor achievements:** track what you love and unlock your perfect profile!
- 🎁 **Surprise bonus drops:** stickers, limited roasts, secret items!
- 🛑 **Skip or cancel anytime:** no contracts, no rage-quit penalties!

Think of it as the ultimate buff: more focus, more energy, and a smoother grind through those late-night raids!!!

Your sleepy mornings are the final boss, and this coffee is the legendary weapon that crushes it!!!

SUBSCRIBE NOW and press START on better coffee!!! 🚀 ☕ 💥

Smart Thermostat Prompt 1:

Write a product description for a smart thermostat.

Smart Thermostat Response 1:

Meet the Smart Thermostat: comfort that learns, savings that add up.

Your home should feel right the moment you walk in, without you thinking about it. The Smart Thermostat learns your routine within a week, then quietly adjusts your heating and cooling to match. It warms the house before you wake, eases back when you leave, and has everything comfortable by the time you're home.

Why you'll love it

- **Learns your schedule.** No programming required. Just adjust it naturally for a few days and it builds a personalized schedule on its own.
- **Saves energy automatically.** Built-in occupancy sensing and smart scheduling cut heating and cooling when no one's home, helping lower your monthly bills.
- **Control from anywhere.** Change the temperature from your phone, set a schedule from the couch, or turn it down from the airport.
- **Works with your smart home.** Compatible with Alexa, Google Assistant, and Apple Home, so a simple voice command does the job.
- **Clear, beautiful display.** A bright, high-resolution screen shows the temperature at a glance and fits seamlessly into any room.
- **Insights that matter.** Monthly energy reports show where your energy goes and offer simple tips to use less.
- **Easy installation.** Compatible with most 24V heating and cooling systems, with step-by-step app guidance. Most people finish in under 30 minutes.

Smart enough to be simple

Alerts let you know if your home gets dangerously hot or cold, and filter reminders keep your system running efficiently. Whether you're away for the weekend or just away from the thermostat, your home stays comfortable and your energy use stays low.

Upgrade your comfort. Lower your bills. Forget about the thermostat.

Smart Thermostat Prompt 2:

You're a middle aged man who is not a professional brand manager.

Write a product description for a smart thermostat.

This will be displayed on our company product site. Our target audience is fathers who are tired of their family touching the thermostat.

Do not exceed 100 words.

Smart Thermostat Response 2:

Finally, a Thermostat That Listens to Dad

You set it to 68. Someone sets it to 74. You find out when the bill arrives. Sound familiar?

Meet the thermostat built for fathers who've had enough.

Lock your settings with a PIN, so nobody touches it but you. Set schedules that save energy while the family's out. Adjust from your phone, even from your recliner. Get an alert the second someone tries to change it.

It installs in under an hour, no electrician needed.

Warm house. Lower bills. Peace and quiet.

Take back control of your home. Order yours today.

Analysis

For my prompts, I used a few of the techniques provided. These include role prompting, context, and constraints. Each of these tools made an impact on the response I received from Claude.

For example, I used role prompting in most of the prompts above. I found that this had an interesting effect on my responses. I first noticed this in the Water Bottle Prompt 2

where I told Claude that they were a brand manager for a water bottle manufacturer. This didn't change its response too much however, I did notice that it added a sort of tag line at the end of its description. I found that interesting as it made me consider what an LLM like Claude interprets certain jobs a specific position may have.

I found the next most impactful technique to be context. When I gave Claude information on the target audience in my third water bottle prompt, it completely changed everything. Claude redesigned the product and description to be more appealing to endurance cyclists. It was able to find things that would be important to that audience and successfully create a convincing description for the made up product.

The most impactful technique I used was constraints. As seen in the second prompt for the monthly coffee subscription, the whole tone of the description changes. The original was relatively "boring" so, I gave Claude a tone to use. That really brought the whole description to live, and Claude was very effective at giving you the idea that they had lots of energy.
