Water bottle - ver. 1: Write a product description for a water bottle.

HydraPeak Insulated Water Bottle

Stay refreshed from sunrise to sunset with the HydraPeak, a water bottle built for everyday adventures.

Double-wall vacuum insulation keeps drinks ice-cold for up to 24 hours or piping hot for up to 12, so your morning coffee is still warm at lunch and your afternoon water is still frosty after a long hike. The durable, BPA-free stainless steel construction resists dents, rust, and odors, and it never leaves a metallic aftertaste.

Features

- **Leak-proof lid** with a carry loop for easy portability
- **Wide mouth opening** that fits ice cubes and cleans easily
- **Sweat-free exterior** that won't dampen your bag or your hands
- **Fits most cup holders** and backpack side pockets
- **Powder-coated finish** for a comfortable, slip-resistant grip

Specs

- Capacity: 32 oz (950 ml)
- Materials: 18/8 food-grade stainless steel
- Dishwasher safe (lid hand-wash recommended)

Whether you're commuting, training, or exploring the trail, HydraPeak keeps up. Available in Glacier Blue, Midnight Black, Sage Green, and Sunset Coral.

Water bottle - ver 2: Write a product description for a water bottle designed for use with hikers, focusing on a heavy duty design that is also cost effective.

TrailForge Heavy-Duty Hiking Water Bottle

Built for rough trails, not showroom shelves. The TrailForge is a rugged, no-nonsense water bottle that takes the abuse of the backcountry and still costs less than the trendy brands.

Drop it on granite, strap it to a pack, or wedge it between boulders. The reinforced, BPA-free Tritan-composite body and thick-wall construction shrug off impacts, scratches, and temperature swings from freezing mornings to sun-baked summits. There's no fragile coating to chip and no premium markup for a logo you'll cover in trail stickers.

Built to Last

- **Impact-resistant body** that survives drops, tumbles, and being buried at the bottom of a loaded pack
- **Threaded, leak-proof lid** with a silicone seal and tethered cap so you never lose it on the trail
- **Wide-mouth opening** for easy refills from streams, compatible with most hiking water filters
- **Integrated carabiner loop** for clipping to a pack, belt, or tent line
- **Textured grip band** for secure handling with wet or gloved hands
- **Molded measurement markings** to track your hydration mile by mile

Specs

- Capacity: 32 oz (950 ml)
- Weight: 7 oz (200 g), light enough for long days on the trail
- Temperature range: -20°F to 212°F (-29°C to 100°C)
- Dishwasher safe

Why Hikers Choose TrailForge
Gear adds up fast. TrailForge delivers the durability serious hikers need at a price that leaves room in your budget for boots, a better tent, or one more trip. It's tough enough to last for seasons and affordable enough to keep a spare in the car.

Available in Trail Orange (for easy spotting), Forest Green, and Slate Gray.

Water bottle - ver 3: Write a product description for a water bottle, in the format of a short social media advertisement.

💧 **Meet your new hydration sidekick.**

Say goodbye to lukewarm sips and leaky bags. The **AquaLoop Bottle** keeps drinks ice-cold for 24 hours and piping hot for 12. ❄️🔥

✅ Double-wall insulated stainless steel
✅ 100% leak-proof, toss it in your bag with confidence
✅ Fits cup holders and gym bags
✅ Easy-clean wide mouth

Whether you're hitting the trail, the gym, or that 9 AM meeting, AquaLoop keeps up. 🏔️💪

Water bottle - ver 4: You are the marketing lead for a up-in-coming water bottle manufacturing company, write a product description based on this format:
Fuel your grind with aqua!

Hydrate. Perform. Repeat.

Fuel your grind with aqua!

Hydrate. Perform. Repeat.

Meet the bottle built for people who don't slow down. Whether you're pushing through a 6 a.m. workout, a packed workday, or a weekend trail, our bottle keeps up with every move you make.

Why you'll love it:

- **Stays cold for 24 hours, hot for 12.** Double-wall vacuum insulation keeps your water ice-cold from sunrise to sunset.
- **Built to take a beating.** Rugged, dent-resistant stainless steel survives gym bags, car cup holders, and the occasional drop.
- **Leakproof, no excuses.** The secure-lock lid means no spills, so toss it in your bag and go.
- **One-hand sip.** Flip, sip, and get back to work. No stopping, no twisting.
- **Clean and BPA-free.** Pure taste with no metallic aftertaste, and a wide mouth that fits ice cubes and makes cleaning easy.
- **Fits your life.** A slim, grippy body slides into most cup holders and backpack pockets.

Every sip is a step toward your next personal best. Stay sharp, stay moving, and keep your goals within reach.

Hydrate. Perform. Repeat.

Available in 20 oz, 32 oz, and 40 oz. Choose from five bold colors.

Ergonomic Chair Prompt: Write a product description for an ergonomic office chair, focus on its affordability and style, with its state of the art supporting tech, while keeping the ad short enough for social media.

Sit Better. Spend Less. Look Great. 💺

Meet the **ErgoFlex Pro**, the office chair that gives your back premium support without the premium price tag.

Standing Desk Prompt: You are a marketing intern looking to write a product description for a standing desk, write your description using a headline and bulleted list, focusing on its use in home offices, and how it can promote general health of its users.

Work Smarter, Stand Taller: The Home Office Standing Desk That Moves With You

Turn any spare corner into a space that keeps you energized, focused, and comfortable all day. Our adjustable standing desk makes it effortless to switch between sitting and standing, so your home office works as hard as you do.

Built for Your Home Office

- **Compact, space-smart design:** A slim frame and generous desktop fit a laptop, monitor, and notebook without crowding a bedroom, nook, or living room.
- **Whisper-quiet height adjustment:** Glide between sitting and standing positions in seconds, without disturbing video calls or the rest of the household.
- **Memory presets:** Save your favorite heights so you can switch positions with one touch.
- **Sturdy and stable:** A solid steel frame stays steady even at full height, so your screen and coffee mug stay put while you type.
- **Clean cable management:** Built-in routing keeps cords tidy and your workspace looking polished, which is perfect for a room that doubles as your living space.
- **Easy assembly:** Set it up in under an hour with the included tools and step-by-step guide.

Designed to Support Your Health

- **Less sitting, more moving:** Alternating between sitting and standing helps break up long stretches of sedentary time, which is linked to a range of health concerns.
- **Better posture:** Dial in the right height for your body to reduce slouching and ease strain on your back, neck, and shoulders.
- **Steady energy and focus:** Changing positions throughout the day can help fight the afternoon slump and keep your mind sharp.
- **Gentle calorie burn:** Standing uses a little more energy than sitting, a small boost that adds up over a workweek.
- **Encourages healthy habits:** A desk that invites movement makes it easier to stretch, shift, and take regular breaks.
- **Ergonomic flexibility:** Fully adjustable height fits users of different sizes and supports a comfortable, natural working position.

Your Best Workday Starts Here

Your home office should support your health, not work against it. Upgrade your workspace and feel the difference from the first morning to the last email.

Note: Individual results vary. Consult a healthcare professional if you have specific health concerns.

Analysis:

In part 2 I tried to create responses with at least every kind of prompting technique to make sure I saw how they all influenced the model's output. From my responses, the ones that changed the output the most were by far output format, mostly in regards to the platform the description would appear on. I found the technique that helped the most in getting better responses was context, as this helped guide the models the most towards a frame of reference I was looking for. Surprisingly few-shot prompting seemed to barely do anything, where Claude simply copied my exact example and then added on a bunch of extra text to the output, kind of ignoring the kind of advertisement I was looking for. As for the other techniques, I noticed not having constraints affected the outputs the most, looking at my water bottle prompt that used constraints (that being the constraint of a short social media ad) and without (the prompt that I used few-shot prompting in) the few-shot example simply completely ignored the format I tried to give it, and just made up its own description below the example I tried to give it to base off of. It's clear that Claude tries to make responses very verbose and densely packed, as to seem more intelligent, and so without constraining that aspect of it, Claude will sort of go off the deep end in its responses. Role prompting also seemed to barely affect Claude's responses, even when giving two different roles (marketing intern in my chair prompt and marketing lead in my role-prompting water bottle prompt) these responses were almost entirely changed by their differing contexts rather than their roles.
